

Global Panel Book

–2017–

An aerial, high-angle photograph of a city street intersection. Tall, modern buildings with many windows line the streets. The street is filled with cars, including yellow taxis and white vans. A large white semi-truck is visible on the left side of the frame. The overall scene is a busy urban environment.

HOW SSI PANELS ARE RECRUITED

Respondents are recruited from thousands of sources to maximize reach and representation. SSI's recruitment policy is broad in scope and is combined with multiple quality controls and checks to ensure all potential respondents are eligible to take a survey.

SSI'S BLEND METHODOLOGY INCREASES CONSISTENCY AND REPRESENTIVITY

Because sources are not only different from each other, but can also change over time, SSI uses a combination of personality and psychographic characteristics to understand and identify the underlying traits which impact the way people answer survey questions.

By controlling the characteristics of people within the sample, based on asking them a short set of key questions, SSI has created an online sample blend which is exceptionally consistent when measured by comparison with external benchmarks, including telephone sample studies and industry measures such as the Grand Mean.

The SSI Blend is continuously monitored and calibrated by a dedicated team of methodologists and analysts.

EVERY RESPONDENT FULLY **AUTHENTICATED**:

- Digital fingerprinting
- Source certification
- Third-party verification
- Geo-IP control
- Time stamps
- Questionnaire quality controls

EVERY RESPONDENT MATCHED TO A **RELEVANT** SURVEY:

- Real-time profiling
- Methodologically-sound questions
- Customized incentives to improve engagement

PROVEN **CONSISTENCY**, SAMPLE AFTER SAMPLE:

- SSI Blend controls consistency
- Multiple points of randomization
- Monitoring by dedicated team

RESPONDENT VALIDATION AND QUALITY CONTROL VIA SSI VERIFY

SSI Verify is a suite of quality control procedures including digital fingerprinting, address verification against USPS databases (standard in the US) and third-party verification on request.

SSI also makes available industry standard verification systems such as True Sample has participated in industry initiatives including the ARF's Foundations of Quality and MKTG Inc's Grand Mean Consistency Audits.

Our passion and expertise lead the industry. SSI strives to exceed the highest independent industry standards.
